

3	Parameter Adaptation Algorithms - Deterministic Environment
3.1	The Problem
3.2	PAA - Examples
3.2.1	Gradient Algorithm
3.2.2	Recursive Least Squares Algorithm
3.2.3	Choice of the Adaptation Gain
3.2.4	Recursive Least Squares and Kalman Filter
3.2.5	Some Remarks on the Parameter Adaptation Algorithms
3.3	Stability of Parameter Adaptation Algorithms
3.3.1	Equivalent Feedback Representation of the Parameter Adaptation Algorithms and the Stability Problem
3.3.2	Stability Approach for the Synthesis of PAA Using the Equivalent Feedback Representation
3.3.3	Positive Real PAA Structures
3.3.4	Parameter Adaptation Algorithms with Time-Varying Adaptation Gain
3.3.5	Removing the Positive Real Condition
3.4	Parametric Convergence
3.4.1	The Problem
3.4.2	Persistently Exciting Signals
3.4.3	Parametric Convergence Condition
3.5	Concluding Remarks
3.6	Problems
